ESCO SCIENTIFIC

ISOTHERM® LABORATORY THERMOSTATIC PRODUCTS

Welcome to Esco

Esco's Vision is to provide enabling technologies for scientific discoveries to make human lives healthier and safer.

The Esco Lifesciences Group is committed to deliver innovative solutions for the clinical, life sciences, research, industrial, laboratory, pharmaceutical, and IVF community. With the most extensive product line in the industry, Esco have passed a number of international standards and certifications. Esco represents innovation and forward-thinking designs, that are of the highest standard quality since 1978.

Availability and Accessibility. Esco has headquarters in Singapore, Indonesia, and Philippines, with manufacturing facilities are located in Asia and Europe. Research and Development (R&D) is conducted worldwide spanning the US, Europe and Asia. Sales, services and marketing subsidiaries are located in 42 major markets including US, UK, Japan, China and India. Esco regional distribution centers are located in Singapore, Malaysia, Thailand, Vietnam, Myanmar, Indonesia, Philippines, Bangladesh, Hong Kong, Taiwan, South Korea, China, Japan, India, UAE, Central and South Africa, Denmark, Germany, Italy, Lithuania, Russia, United Kingdom, and USA. Because of our worldwide presence, you can be sure that Esco is within your reach.

High Quality, Reliable, and Dependable. Esco products are of high quality, reliable, and dependable; assuring customers of research accuracy. Cross functional teams from Esco Production, R&D, Quality Assurance, and Senior Management, are regularly assembled to review and implement areas for improvement.

Esco Cares for Your Safety. Esco focuses on providing safety not just for your samples but also for you and the environment.

Esco Cares for Your Comfort. Building ergonomic designs and reducing noise levels of the units ensures comfort for our users.

Esco Cares for the Environment. One in every four of Esco's employees is involved in R&D and a number of them evaluate new components and/or designs to produce energy efficient equipment. Being GREEN is more than just modifying parts used to produce a new energy efficient technology, it is also embodied in the every aspect of the company.

Customer Service and Support. Our service does not stop once purchase has been done. Esco gives on-time customer service and offers end-user seminars, service training, preventive maintenance, and provides educational materials and informative videos.

As Esco takes the opportunity to respond to the world's needs, we aim not only to contribute in the advancement of scientific discoveries but also in making the world a safer, healthier, and better place to live in.

LABORATORY THERMOSTATIC PRODUCTS OVERVIEW

Forced Convection and Natural Convection

Convection is a method of heat energy transfer that involves the movement of a fluid (gas or liquid). Fluid in contact with the source of heat expands and tends to rise within the bulk of the fluid. Cooler fluid sinks to take its place, setting up convection current. However, in a forced convection device, the fluid motion is generated by an external source (like a pump, fan, suction device, etc.).

Forced Convection Laboratory Oven

Laboratory oven is used for high-volume thermal convection applications. This provides uniform temperature throughout the chamber necessary for annealing, dying, sterilizing, and other industrial lab functions. Typical sizes are from one cubic foot (28 liters) to 32 cubic feet (906 liters) with temperatures that can reach 300°C (572°F).

Forced Convection Laboratory Incubator and Natural Convection Laboratory Incubator

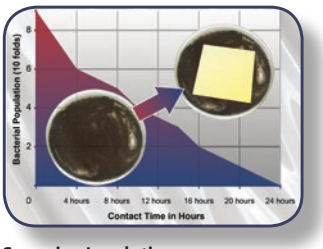
Laboratory incubators are devices that provide temperature-controlled environment to support growth of microbiological cultures. Typical forced and natural convection incubators are insulated boxes with an adjustable heater, going up to 60°C to 65°C (140°F to 149°F), though some can go slightly higher (generally to no more than 100°C).

Refrigerated Incubator

Generally called low temperature incubator designed to maintain temperatures below ambient to as low as about 10°C. Maintaining low temperature is necessary to perform Biochemical Oxygen Demand (BOD) testing which involves incubating samples saturated with oxygen at 20°C usually for five days.

Isotherm®
Forced Convection Laboratory Ovens

Esco Isotherm® laboratory ovens is designed with a forced-convection ventilation system, intuitive interface, microprocessor PID control with programming options, a 4-zone heated air jacket, and ergonomic feature to provide quality and convenience.



Quality Esco Construction

- Electro-galvanized steel exteriors
- Isocide™ coated external surfaces to eliminate 99.9% of surface bacteria within 24 hours of exposure

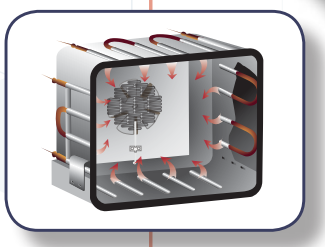
Superior Insulation

- Improves chamber stability while reducing external surface temperatures
- Reduces heat load output to the laboratory and operating power consumption, and lowers operating costs

SmartSense™ Microprocessor PID Control Technology

- Connected to an instrument-grade precision platinum-temperature probe
- Ensures fast ramp time. Prevents overshoot and ensures stable temperature once set point is achieved
- Twin temperature display for easy monitoring ("Actual" and "Set Point" displays)
- Diagnostic LEDs simplify service
- Air flow adjuster via slider for exchange rate of air
- Comes with a timer function (0000 - 9999 minutes) and up to 10 user-configurable program operations

Isotherm® Forced Convection Laboratory Oven Model OFA-110-8



Pre-Heat Chamber Technology

- Guarantees maximum thermal performance
- 4-zone heated air jacket ensures stable heating and maximum temperature uniformity in the chamber
- Standard temperature range of up to 300°C for maximum application stability
- 2-point door seal and eccentric hinge ensures maximum gasket compression for stable chamber temperature

Ventiflow™ Ventilation System

- Forced convection design produces faster temperature response rates, improves uniformity and reduces fluctuation
- Permanently lubricated and maintenance-free fan for uniform air circulation
- Low energy consumption and low noise level
- Adjustable fan speed and air exchange rates
- Fresh air entry from the base of the chamber, combined with the rounded corners of the chamber interior and air exhaust at the rear of the chamber, creates uniform air circulation ensuring maximum temperature uniformity

**Up to 98% of the set value. For the set point ≥50°C, if the temperature reading is already 2°C below the set point, it will take longer time to reach set point, due to prevent overshoot.*

Note:

- *All technical specifications are specified for units with standard equipment at an ambient temperature of 25°C and a voltage fluctuation of ±10%.*
- *The temperature data are determined in accordance to DIN 12880 standards as per factory type test condition.*
- *Stainless steel exterior option is available for all sizes.*

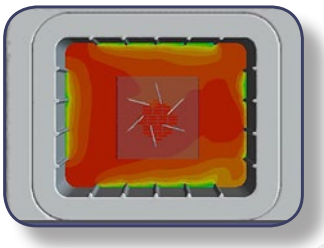
Isotherm®
Refrigerated Incubators

Green Product

Esco Isotherm® refrigerated incubator is designed to maintain temperatures below ambient to as low as about 10°C. It is built with reliable performance and standards. Ergonomic, intuitive interfaces, microprocessor PID controls with programming options, 4-zone heated air jacket, precisely tuned and tested ventilation and insulation package, all supported by Esco's solutions-based sales and service representatives worldwide.

Pre-Heat Chamber Technology

- Ensures stable heating and maximum temperature uniformity in the chamber
- Standard temperature range of 0°C up to 100°C for maximum application flexibility
- 2-point door seal and eccentric hinge ensures maximum gasket compression for stable chamber temperature



SmartSense™ Microprocessor PID Control Technology

- Connected to an instrument-grade precision platinum-temperature probe
- Ensures fast ramp time. Prevents overshoot and ensures stable temperature once set point is achieved
- Twin temperature display for easy monitoring ("Actual" and "Set Point" displays)
- Diagnostic LEDs simplify service
- Air flow adjuster via slider for exchange rate of air
- Comes with a timer function (0000 - 9999 minutes) and up to 10 user-configurable program operations

UV Disinfection

- Can be manually or automatically operated

Ventiflow™ Ventilation System

- Forced convection design produces faster temperature response rates, improves uniformity and reduces fluctuation
- Ventilated stainless steel shelves contribute to uniform air circulation
- Low energy consumption and low noise level

Isotherm® Refrigerated Incubator, Model IFC-110-8

Auto-Defrost System

- Auto-heating activates and continues for a predetermined time during operation
- Auto-defrosting during operation and activates regularly
- Influence on temperature fluctuation and uniformity is minimal

Glass Door

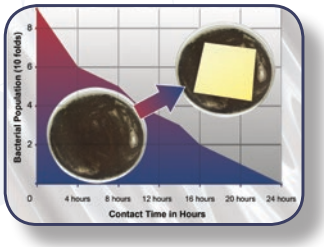
- For observing samples inside the chamber during operation

Water Reservoir

- For water collection during defrosting

Side Access Port

- For temperature validation and mapping



Quality Esco Construction

- Electro-galvanized steel exteriors
- Isocide™ coated external surfaces to eliminate 99.9% of surface bacteria within 24 hours of exposure

Maintenance-free Fan

- Permanently lubricated and maintenance-free for uniform air circulation

OTHER SUPERB FEATURES OF ISOTHERM® LABORATORY THERMOSTATIC PRODUCTS

Safe, Superior Protection for Sample, User and the Environment

- Multiple redundant over-temperature protection systems guarantee maximum sample and user protection
- Over-all temperature protection meets DIN 12880 Class 3.1 standards

Ergonomic Design

- Access port for temperature validation and mapping

RS485 Communication Port

- Provides serial communication port for PC that can be daisy chained from product to product and connected to a PC

Ergonomic Door Handle with Keylock

- For gravity assisted operation and prevents unauthorized access to sensitive samples

Easy to Clean

- "Cleanroom" design, single-piece stainless steel chamber with rounded corners and dismountable glass door

Easy to Service

- Diagnostics functions include historical read-out of temperatures, sensor inputs and controller settings
- Service can be carried out from the front and electrical components are isolated form the work chamber and easily accessible for replacement
- Low service costs

APPLICATIONS

Forced Convection Laboratory Ovens

Application	Material/Sample
Drying	Glassware
	Powder
	Paper & Textile
	Soil and Sand
	Electronics
	Pharmaceutical Preparations
	Tape
Material Testing	Cables
	Plastics
Curing	Adhesives
	Plastics
	Metals
Heated Storage	Drugs and Pills
Vulcanization	Rubber

Forced and Natural Convection Laboratory Incubators

Application	Material/Sample
Microbiological Culture	Bacteria, Yeasts and Molds
Coliform Determination	Bacteria
Egg Incubation	Eggs
Heated Storage	Media & Samples
Gene Cloning	Bacteria, Yeasts and Molds
Pharmaceutical Stability Testing	Pathogenic Bacteria
Food and Beverage Testing	Bacteria, Yeast and Molds
Paraffin Embedding	Paraffin

Refrigerated Incubators

Application	Material/Sample
BOD Determination of Wastewater and Sewage	Bacteria
Plant Cell Growth	Plant Cell
Fish and Insect Cell Growth	Fish and Insect Cells
Fermentation Studies	Bacteria and Yeasts
Microbiological Culture	Bacteria, Yeast and Molds
Pharmaceutical Stability Testing	Pathogenic Bacteria

OPTIONS AND ACCESSORIES

Wall bracket (only for 32 L and 54 L chambers)

- Accommodates desired operating heights

Reversed Door Swing (Factory-installed)

- For OFA, IFA, INA models only

Voyager® Software Kit

- Esco Voyager® is a PC-based software package developed for remote monitoring, datalogging and programming/device configuration of Esco controlled environment laboratory equipment

Support stands fixed height at 715 mm (28")

Additional Shelf

- Two shelves are included for 32 L, 54 L, 110 L, 170 L and 240 L models as standard. Additional shelves may be ordered.

Optional Stainless Steel Exterior

- Robust construction and corrosion-resistant surface that meets pharmaceutical and clinical laboratory requirements
